

Risk Assessment for Infinity Tower - Tower section only

What are the Hazards which cause:	Who/what may be harmed? (give specific of people e.g. staff, visitors, users or contractors)	What is done now? (i.e. provision of training, corporate and local standards, codes of safe working practice, supervision, monitoring systems)	What is the rate of Risk? (Rate risk as Low, Medium or High)	What action needs to be taken? (the needs to be considered in that the risks are identified and effectively controlled)	By when? (what is the target date for completion)
Fall from height through webbing rings	Participants	Descend one level at a time. Use webbing levels to halt rapid descent. Matting provided to break fall and prevent injury on lowest ring.	Severity of Risk (S)- 1 Likelihood of Risk (L)- 2 Overall Risk (S x L)= 2 LOW	Observe safe practice by listening to climbing and descending advice from Instructor	Ongoing
Descending onto other climbers	Participants	Good observation by other climbers whilst descending	Severity of Risk (S)- 1 Likelihood of Risk (L)- 3 Overall Risk (S x L)= 3 LOW	Observe safe practice by listening to climbing and descending advice from Instructor. Footwear removed prior to climbing	Ongoing
Minor bodily injury to other climbers	Participants	Consider safe route to ascend/ descend away from other climbers. Good observation by climbers at all times	Severity of Risk (S)- 2 Likelihood of Risk (L)- 2 Overall Risk (S x L)= 4 MEDIUM	Observe safe practice by listening to climbing and descending advice. Footwear removed prior to climbing.	Ongoing
Injuries caused by people wandering into the site	Participants/Instructors	Barriers are used to separate the public from the course.	Severity of Risk (S)- 2 Likelihood of Risk (L)-1 Overall Risk (S x L)= 2 LOW	Signage and the set out of site makes it clear where people can or cannot go	Ongoing

Risk Assessment for Infinity Tower - Tower section only

What are the Hazards which cause:	Who/what may be harmed? (give specific of people e.g. staff, visitors, users or contractors)	What is done now? (i.e. .provision of training, corporate and local standards, codes of safe working practice, supervision, monitoring systems)	What is the rate of Risk? (Rate risk as Low, Medium or High)	What action needs to be taken? (the needs to be considered in that the risks are identified and effectively controlled)	By when? (what is the target date for completion)
Head Injury from falling Objects	Participants	Empty pockets of loose objects e.g. coins, mobile phones etc	Severity of Risk (S)- 1 Likelihood of Risk (L)- 2 Overall Risk (S x L)= LOW	Participants to remove all loose items from pockets and store in boxes provided whilst on the course	Ongoing
Suspension injury from loose clothing, jewellery, spectacles or other loose item	Participants	Ensure loose clothing is secured and dangling jewellery/spectacles or other such items are removed to avoid potential hang-ups or injury when climbing through webbing	Severity of Risk (S)- 1 Likelihood of Risk (L)- 2 Overall Risk (S x L)= 2 LOW	Participants to remove all loose items from pockets and store in boxes provided whilst on the course	Ongoing
Injuries occurring during unsupervised use/ access	Participants	Restrict access when not in use	Severity of Risk (S)- 2 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 2 LOW	Lower into horizontal position if not in use. Secure elevation switch	Ongoing
Participants not suited the course i.e. being too heavy or too small to deal with the elements. This may result in a hazard to themselves or other course users	Participants	Clear signage showing the allowable user minimum heights accompanied and unaccompanied are displayed. Signage also dictates the maximum weight of a user	Severity of Risk (S)- 2 Likelihood of Risk (L)- 2 Overall Risk (S x L)= 4 MEDIUM	Clear signage and training staff in the clear procedures and policies of the company to maintain a safe operation	Ongoing

Risk Assessment for Infinity Tower - Tower section only

Calculation of Risk Evaluation

Severity (S)

Severity of Risk is judged by evaluating the effects of the hazard if the risk occurs.

This is evaluated as Minor = 1, Major = 2, Serious = 3

Risk Likelihood (L)

The likelihood of the harm occurring is evaluated on the following basis:

Unlikely =1, Possible = 2, Likely = 3

Overall Risk

Overall Risk is calculated by multiplying the figure for Severity (S) x Likelihood (L). The figure calculated is related to the rate of risk as follows

1 to 3 Low, 4 to 6 Medium, 7 to 9 High

Circulation	Management, Staff & Show or Event Organisers
Assessor	G Ogilvie
Date Assessed	29 February 2012
Review Date	Every 12 months from 1st March 13

Risk Assessment for Slide only

What are the Hazards which cause:	Who/what may be harmed? (give specific of people e.g. staff, visitors, users or contractors)	What is done now? (i.e. provision of training, corporate and local standards, codes of safe working practice, supervision, monitoring systems)	What is the rate of Risk? (Rate risk as Low, Medium or High)	What action needs to be taken? (the needs to be considered in that the risks are identified and effectively controlled)	By when? (what is the target date for completion)
Over enthusiastic participants	Participants	Management by Staff	Severity of Risk (S)- 1 Likelihood of Risk (L)- 2 Overall Risk (S x L)= 2 LOW	Observe safe practice at all times	Ongoing
Jumping Off top of Slide	Participants	Catch net at top of slide to prevent Participants from jumping off the Slide	Severity of Risk (S)- 2 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 2 LOW	Staff to be vigilant at all times	Ongoing
Larger participants colliding with smaller participants	Participants	Management by Staff. Avoid allowing large participants to be using the activity at the same time	Severity of Risk (S)- 3 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 3 LOW	Staff to be vigilant at all times	Ongoing
Fall from height	Participants	The slide is designed with high sides to avoid accidental fall & the slide is securely tied to the structure	Severity of Risk (S)- 5 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 5 MEDIUM	Daily checks to make sure there are no gaps or loose net	Ongoing

Risk Assessment for Slide only

What are the Hazards which cause:	Who/what may be harmed? (give specific of people e.g. staff, visitors, users or contractors)	What is done now? (i.e. provision of training, corporate and local standards, codes of safe working practice, supervision, monitoring systems)	What is the rate of Risk? (Rate risk as Low, Medium or High)	What action needs to be taken? (the needs to be considered in that the risks are identified and effectively controlled)	By when? (what is the target date for completion)
Tripping over anchorage points / spare equipment / electrical cable	Participants	All anchor points must secure and installed as per manufacturers instructions. All cables must covered to avoid trips etc	Severity of Risk (S)- 2 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 2 LOW	Daily checklist carried out	Ongoing
